

COOK'S ENDEAVOUR

A Voyage of Discovery Across the Curriculum

A gift to the nation from Bond Corporation.

COOK'S ENDEAVOUR

A voyage of discovery across the curriculum

Cook's Endeavour gives students the opportunity to relive the past. They can experience the excitement and despair of early maritime exploration as they 'sail' with Lieutenant James Cook and his crew of H.M. Bark Endeavour on their epic Pacific voyage.

Let your class become part of history. Let them test their diplomatic skills in Rio, their seamanship skills in the dangerous waters off the East Coast of New Holland and let them face life and death decisions in Batavia. What will they find on the other side of the world and can they make it home to tell everyone about it?

Each student can be a member of the class crew, or groups of three or four students can each form their own crew. Ideal for the class with just one computer, though just as suited to the multi-machine classroom, *Cook's Endeavour* can be adapted to suit your teaching style. Trace the voyage that Cook and his crew took or plot a voyage of your own — but make sure you are prepared!

Cook's Endeavour is as open ended, as structured, and as challenging as you can make it. With the help of the extensive support materials contained in the kit, you can develop a whole range of interesting activities for other curriculum areas. *Cook's Endeavour* is a complete resource kit with a comprehensive teachers' guide, enrichment activities, information cards, crew profiles, maps and activity booklets. Set sail for a voyage of discovery across the curriculum.

THE ENDEAVOUR REPLICA PROJECT

Just as *Cook's Endeavour* brings Cook's first voyage to life for the school children of Australia, the *Endeavour Replica Project* will bring to life his famous ship for all Australians. After months of careful research and experimentation, The Bond Corporation has begun the construction of a replica of the Endeavour. She is being built on the shores of the Indian Ocean, in the West Australian port city of Fremantle.

Her hull will be launched in 1990 and early in 1991 she will sail proudly through Sydney Heads to her new home at the National Maritime Museum in Darling Harbour — a gift to the nation and a tribute to a great seaman.

THE NATIONAL MARITIME MUSEUM

Australia's involvement with the sea is a vital part of our nation's heritage. The Australian National Maritime Museum is being developed to tell the story of that involvement. The museum will collect, conserve, restore and display unique and significant maritime items ranging from the involvement of Aborigines with the sea, through European exploration, to Australia's colourful beach and boating culture.

When the Endeavour replica arrives at the museum in 1991 she will become the prime exhibit and focal point of the Museum's display of Australian maritime history.

THE AUTHORS

Cook's Endeavour was created by a team of teachers, authors, researchers and programmers. The idea was originally conceived and designed by **Bruce Dixon**, who co-ordinated the project. **Sarah Peckham**, **Paul Duggan**, **Mike Lefroy**, **John Longley** and **Taka** all worked on the design of the package with **Bruce**. **Sarah** was also responsible for designing and writing the support materials.

Paul Duggan wrote the original BBC version of the program and **Grahame Willis** did the Apple version.
